# CZUR M3000 Pro

Professional Book Scanner

· 20Mps HD name-brand camera
· Maxime scanning A3 size (11.69 x 16.53 inches)
· Scan speed 30 - 60 pages per minute
· CZUR scanner professional image processing software
· Extra built-in light

A high quality and affordable digital solution for binding archives and books

· 20 Mps world name-brand High definition camera and sensor technology
· Creatively using 32 bit MIPS CPU to improve scanning speed
· Scanning speed 30 pages for flat single page and 60 pages for books
· Specially design for binding documents and books without loosing sheets
· CZUR professional image processing softwar can flatten curves, remove fingerprints, purify background, correct position, smart paging and smart cutting automatically
· Support Color, Patterns, Stamps, Grayscale, B&W 5 scanning modes and can be transferred freely
· Combined Sides scanning, blank page detection, adding watermark
· Output to JPG, PDF, TIFF directly
· Integrated OCR technology from ABBYY company and support to output editable documents like Word/seachable PDF/Excel format
· V shaped cradle to make your scanning work in comfortably way
· Extra built-in light, improving the scan effect on glare surface
· Support to customize development and bind with other systems through SDK and TWAIN

Sensor type:	HD CMOS	Scanning materials:	Documents, Books, Magazines, Forms, Invoices,
Sensor size:	1/2.3"		Certificates, Business cards and Sculpture objects
Pixels:	20 Mps	Image format:	JPG, PDF, TIFF
Resolution:	5248*3936	Scanning access:	Device Control, Software triggering, Hand button,
Processor:	32-bit MIPS CPU		Foot pedal
Prepare time:	0	USB port:	2.0 High speed
Scan speed:	30-60 pages/min	System support:	Win XP, Win 7/ 8/10, 32/64-bit; macOS 10.11 and above
Max size:	A3 format	PC recommend:	CPU: core I5 and above
Image cache:	Hi-Speed DDR	Power supply:	External adapter, input 100-240V, 50/60Hz, output 9V/2A
LCD:	2.4", 4:3, 320x240	Device dimension:	505*520*425 mm (L*W*H)
DPI (Default)	300	Device weight:	4.5KG (Net)
