

# StarryHub™

Business Conference System

# Many Items & Cables

# VS

# One StarryHub

❌ Traditional Meeting Room

✅ Modern Meeting Room

# Projector

- ❌ Noise / Heat
- ❌ Installation
- ❌ Replace light bulb frequently
- ❌ Many wires on table
- ❌ Set up before each meeting
- ❌ Unstable voice reception
- ❌ Voice not delivered clearly
- ❌ Speaker for entertainment purpose.  
Bass can cause sonic fatigue when in long conversation.
- ❌ Long startup time
- ❌ Remote control without keypad
- ❌ Cannot install other apps

# StarryHub™

- ✅ Super quiet, low heat
- ✅ No installation
- ✅ Long life-span light source
- ✅ Minimum cables needed
- ✅ No set up required
- ✅ All in one. More stable
- ✅ Wireless screen casting for up to four screens at the same time
- ✅ Speaker designed for human voice transmission with mid-frequency
- ✅ Wake up in 1 second
- ✅ TouchBoard, high efficiency
- ✅ CZUR patented AI technology

## Interactive Meeting Board

- ❌ 55/65" screen too small for meeting room
- ❌ 76/86" too expensive
- ❌ Bulky, hard to move/relocate (100+ KGS)
- ❌ Poor voice reception
- ❌ OS stuck regularly
- ❌ Hard to install/high installation cost
- ❌ Cannot cast 4 screens at the same time
- ❌ High power consumption 300-600W

## StarryHub™

- ✅ 80-120" whatever size you prefer
- ✅ Relatively low cost
- ✅ Light weight 3kg, portable
- ✅ Good voice reception
- ✅ Smooth OS
- ✅ ZERO installation cost
- ✅ Cast up to 4 screens wirelessly
- ✅ Power consumption 140W

A Masterpiece Presented by CZUR

# Defining the next era for smart video conferencing

StarryHub is equipped with a number of leading technologies and integrates HD projector/camera, microphone/speaker designed for human voice transmission, wireless screen casting and more features.

TouchBoard and CZUR StarryOS compose a whole new interaction experience for video meetings.

CZUR patented AI technology for enhanced human voice transmission and purification, improves your video meeting experience like never before.

## Media Coverage

CZUR is a high-tech company with focus on developing smart audio-visual products for office use. Our core is our patented AI algorithm in the field of audio-visual, image processing and more.

In CZUR, we believe AI should not be limited in labs. AI should be integrated into good products and service that can help people improve their work and life experience.

Since CZUR was founded 9 years ago, we insist on doing our own research and development. Our product category includes hardware (device), computer/smart phone APPs, Cloud service, algorithm.

CZUR hardware(device) products include book scanner, document scanner, sitting posture corrector, all-in-one video meeting system and more to come.

Not only made in China, but also designed in China, brand in China!

CZUR products have been delivered to more than **160 countries and regions** in the world.

Customer type: individual, company, state office, university etc..
