pdfcompressor™

PdfCompressor Generates the Most Efficient PDF Files
Available, with OCR, Compression, and PDF Conversion

As an industry leader in the document capture industry, CVISION Technologies understands the software needs of corporate business. Built for high-volume, corporate environments, the newly updated PdfCompressor 6.0 is designed to optimize PDF documents, making them smaller, faster, more accessible and easier to process. With best in class OCR & dramatic file compression, PdfCompressor 6.0 not only integrates with existing workflows, but also improves them by producing significantly more manageable files. This allows organizations to spend less time managing their digital files and more time on value-producing tasks.

What is PdfCompressor?

PdfCompressor can make your documents fully searchable with CVISION's super-accurate OCR. Intelligent pre-processing makes our OCR far more accurate and dramatically faster than leading OCR products. Plus, our OCR is available in over 117 languages. PdfCompressor's OCR can process paper-based documents in real-time, accelerating the entire workflow. PdfCompressor combines super-accurate OCR, including support for multi-directional and low contrast text, with ICR for handwritten text and barcodes.

Using the latest in image compression technology and the new JBIG2 & JPEG2000 compression formats, PdfCompressor makes the most compact, web-friendly PDF files available. PdfCompressor compresses typical black and white scans by a factor of 5x-10x (compared to TIFF G4) and color scans by a factor of 10x-100x (compared to JPEG). Our unmatched text-focused color scan processing ensures maximum data retention, even under high compression. Compressed files look exactly the same as the originals, and can be viewed using Adobe Reader. By reducing file size, documents can be emailed, transmitted, accessed, and stored more efficiently.

Uniquely, PdfCompressor combines image processing, real-time OCR, advanced compression, PDF/A, Bates-stamping, web-optimization, batch multi-threading and encryption all in one step. PdfCompressor also features SharePoint optimization, integrating seamlessly so files within SharePoint can be compressed.

More Accurate & Faster OCR

PdfCompressor's OCR engine has been tested to be 5%-10% more accurate than leading OCR engines. High accuracy recognition rates are achieved by

---

PdfCompressor Benefits:

• Email, transmit, download & upload compressed documents quickly & easily
• Reduce storage & transmission requirements by 10x-100x
• Create instant access to paper-based **information with high-speed OCR**
• Generate more accurate searchable **PDF files**
• **View files instantly with PDF streaming web optimization**
• Archive documents with full PDF/A compliance
• **Produce better-looking files at much smaller file sizes**

leveraging advanced image processing techniques, including: resampling, foreground/background separation, auto-rotation, and font learning. In addition, PdfCompressor's OCR is the fastest OCR engine available, processing documents in real-time.

Leverage the Highest OCR Accuracy Rates Available:

	CVISION	Leading OCR Engine	Ratio
25 Black & White Files	11,650	10,151	CVISION has 15% more word hits
25 Color Files	4,905	4,421	CVISION has 11% more word hits

Featuring an Updated GUI for Greater Ease-of-Use:

CVISION's Accurate OCR Features:

By utilizing PdfCompressor's advanced image processing techniques, the OCR engine has proven to be the most accurate OCR engine available. More accurate OCR translates into more reliable text-searches, more accurate data extraction, more automated document-centric processes, and more efficient employees.

OCR Accuracy:
- Utilize an OCR engine 10% more accurate than competing products
- Recognize more keyword phrases than competing OCR products
- Leverage OCR dictionaries for legal, medical, and financial industries
- Reduce the amount of time spent manually keying in data

CVISION's High Speed OCR Features:

CVISION provides the fastest OCR available, enabling users to process up to 10 pages/core/second on multipage documents.

Real-time Speed:
- Reduce the number of servers dedicated to document processing
- Ensure that all office files are searchable
